NEWS RELEASE

The Olenergies startup, flagship of the battery industry at the Great Exhibition of "Made in France" at the Élysée Palace.

Olenergies, designer-manufacturer of smart connected lithium batteries was selected at the beginning of this year to showcase its innovative solutions by three organisations: the "Made in France" exhibition organised by the Élysée Palace, the GICAN "SEASStart" programme and the "La Fabrique Défense" exhibition launched by the French Ministry of Defence. The assets of Olenergies solutions that made the difference: French manufacture, environmental compliance, long life, on-board intelligence.

Olenergies presents its know-how to the President of the Republic at the Élysée Palace.

With its strong commitment to France, Olenergies has been selected from among 1,750 companies to participate in the "Made in France" exhibition at the Élysée Palace on 18 and 19 January. This exhibition will be held until 5 April at the Ministry of the Economy and Finance.

On this occasion, the company presented one of its latest innovations: the OlenBox lithium battery, the most compact and high-performance battery in its category.

Mainly dedicated to the replacement of lead batteries, its production is increasing to 75 units per week thanks to a new production line located in Montreuil, Seine-Saint-Denis.

Julien Le Guennec, President of Olenergies, took this opportunity to present the company's industrial development plan to the President of the Republic Emmanuel Macron.

The growth plan, guided by ethical and ecological choices, is particularly promising: technological breakthroughs, French industrial sector, job creation... the plan is structured, coherent and in line with the logic of the European Battery Alliance (EBA) to which Olenergies has just joined.

Mr French President Emmanuel Macron

Mr Bruno Le Maire France's Minister of the Economy and Finance

This vision, supported by the company's results, has won the government's support for the company. The founder of Olenergies continued discussions with the Minister of the Economy and Finance Bruno Le Maire, the Minister for Overseas France Annick Girardin, the Secretary of State Agnès Pannier-Runacher, Yves Jégo, who chairs the "Origine France Garantie" certification, Danielle Dubrac, Vice-President CCI Paris Ile-de-France, as well as representatives of the Directorate General of Companies.

Olenergies, know-how at the service of the most complex defence applications

A member of the "Club Phoenix", supported by the French Ministry of the Armed Forces and winner of the Gican SEASStart start-up accelerator, Olenergies was also present at the "La Fabrique Défense" event on 17 and 18 January.

The company presented its systems dedicated to the specific applications and constraints of the Defence sector. On a first joint exhibition area with the French Navy, Gican and Naval Group, Olenergies exhibited its battery systems dedicated to the civil and defence naval sector for the construction of the ships of the future. In a second area, Olenergies presented its innovative battery solutions dedicated to the most extreme situations for other Army corps.

On this occasion, Julien Le Guennec met with the French Minister of the Armed Forces Florence Parly to explain his future partnership with the Defence Innovation Agency dedicated to civil and military innovations.

Olenergies: spearheading the industrial battery sector

"I am very proud that Olenergies has been recognised and selected by all these bodies: "Airbus des batteries", "Fabriqué en France" and "La Fabrique Défense" exhibitions, Club Phoenix, Seastart Programme.... Olenergies, spearheading the French and European industrial development of batteries, contributes to national energy independence through its expertise and know-how in the design, manufacture and industrialisation of complex electrochemical storage systems, while respecting the environment. Designed and eco-built in France, Olenergies' batteries are high-performance, very long-lasting and suitable for all applications, including the most demanding".

About Olenergies

Olenergies designs and manufactures long-lasting, intelligent and highly secure lithium batteries for: storing energy from renewable sources, replacing lead batteries, supplying power to vehicles, robots and ships, and bringing flexibility to electrical networks.

Designing and building in France is at the heart of Olenergies' strategy: we want to create a new industrial sector that creates value and jobs in Europe, that favours short circuits and respects the environment.
